

2016 was a year of great progress across our hospital network. We cared for more people than ever before, while expanding capacity and advancing quality of care.

We are the main provider of secondary and tertiary healthcare in Qatar and one of the leading hospital providers in the Middle East. For nearly four decades we have been dedicated to delivering the safest, most effective and compassionate care to all our patients.

Our network is made up of nine hospitals – six specialist hospitals and three community hospitals – as well as the national Ambulance Service, home and residential care, and mental health services.

We are continually measuring our services against the highest international standards. In early 2016, we achieved the significant distinction of becoming the first healthcare system across the globe to have all its hospitals accredited by Joint Commission International under the Academic Medical Center accreditation program.

Additionally, the Ambulance Service, Home Healthcare Service, Stroke Service and Palliative Care have all received this prestigious accreditation since 2011.

Academic health is central to our healthcare vision, which at its heart combines innovative research, top-class education and excellent clinical care.

Focusing on both preventative and curative care, we are guided by the principle that a healthy population, served by a world-class, well-managed healthcare system, is essential to the country's development.
